

ANGKOR GOLD CORP.

- **Further assays received from Border prospect, Oyadao tenement, Cambodia.**
- **Value of 8.9g/t over 0.98m in drillhole OY11-042**
- **Drilling continues on bull's eye on Border South.**

VANCOUVER, BC (April 10, 2012)

ANGKOR GOLD CORP. (TSXV: ANK) (“ANGKOR”) has received further assay results from the current Border Prospect drilling program from the Oyadao Tenement, Ratanakiri Province, Cambodia.

These are the final results from holes that targeted the Border North Vein, plus one hole from the EM anomaly on the north edge of the “bull's eye” multi-element ‘C’ zone soil geochemical anomaly of Border South.

The most exciting result is from OY11-042, in which no values of significance had previously been reported and which lies immediately to the west of OY12-051.

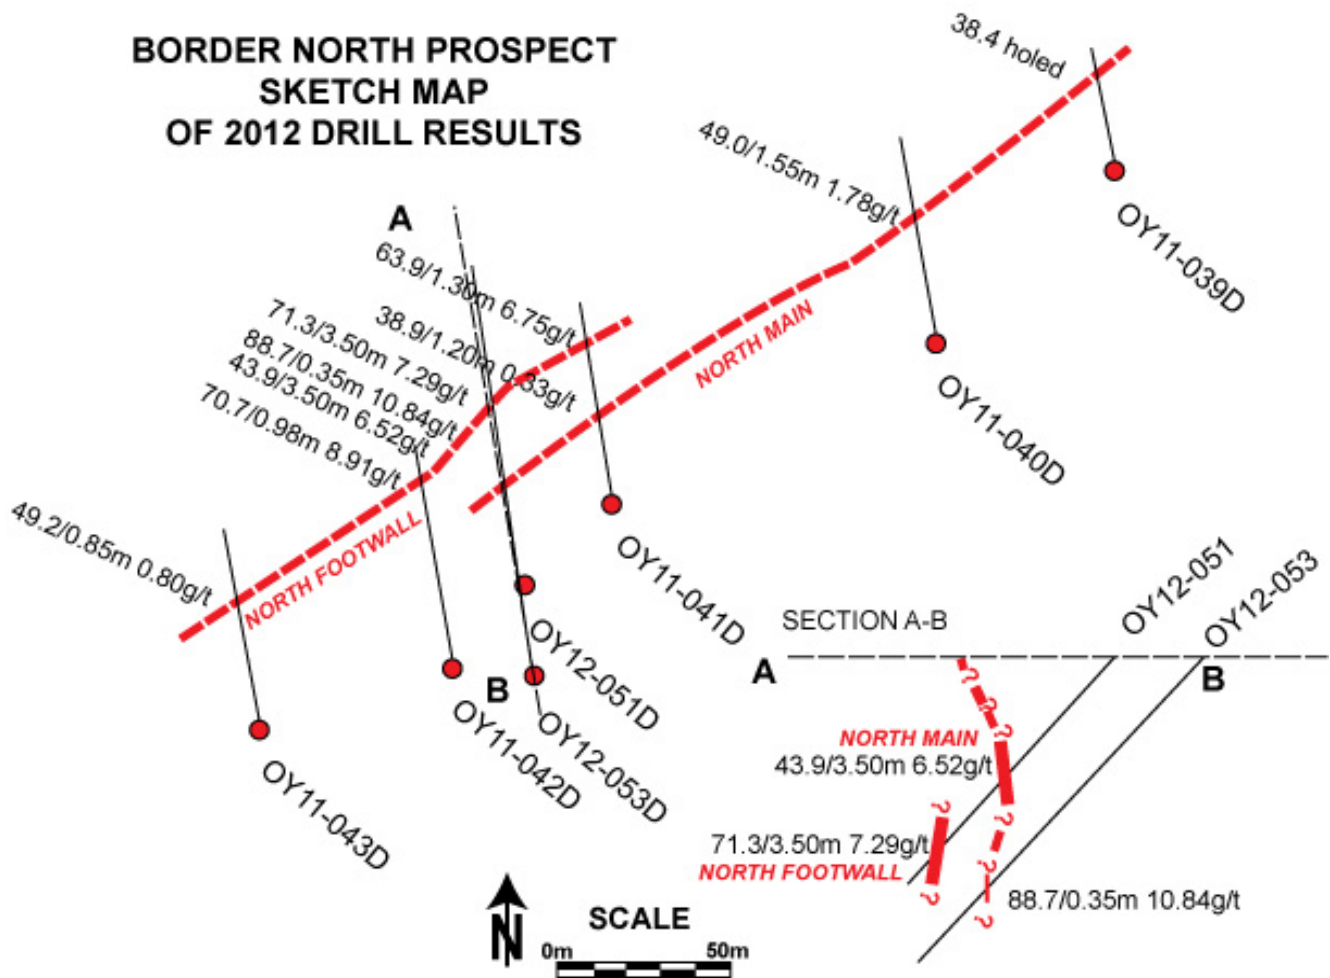

Following standard company procedure, second round entire hole half core sampling has highlighted a previously unknown gold bearing geological unit grading at 8.91 g/t Au over 0.98m associated with a mafic dyke. The discovery of this potential new gold bearing unit has stepped up our follow up sampling program with a specific focus on any similar intervals and opens up the north vein prospect to more than one phase of gold mineralisation.

HOLE NUMBER	DEPTH			GRADE				
	from	to	int	Au g/t	Ag g/t	Cu %	Pb %	Zn %
OY11-042D	70.71	71.69	0.98	8.91	4.10	0.037	0.001	0.007
OY12-053D	88.65	89.00	0.35	10.84	0.90	0.011	0.015	0.058
OY12-054D	0.00	7.30	7.30	trace	5.27	trace	trace	trace

*Note that as this is very early in the exploration history of the property, true thicknesses cannot be made with any degree of certainty. Hence all thicknesses quoted are intersection thicknesses, with no corrections applied. However, angle of intercept suggests that the intersection thickness is very close to true thickness..

Gold mineralisation in the north vein area has previously only been associated with polymetallic-sulphide en-echelon, meso-thermal style quartz carbonate veins.

**BORDER NORTH PROSPECT
SKETCH MAP
OF 2012 DRILL RESULTS**

The tables below outline the intersections made to date on the east end of the Border North Vein, listed by their apparent association:

NORTH MAIN					INTERVAL			
Hole	TD	R.L.	UTM_E	UTM_N	FROM	TO	WIDTH	Au g/t
OY11-039D	50.15	141.00	768431	1524284	38.35	39.80	1.45	
OY11-040D	79.10	142.00	768379	1524237	49.00	50.55	1.55	1.78
OY11-041D	79.65	152.00	768285	1524193	38.90	40.10	1.20	10.33
OY12-051D	120.65	158.00	768259	1524172	43.90	47.40	3.50	6.52

NORTH FOOTWALL					INTERVAL			
Hole	TD	R.L.	UTM_E	UTM_N	FROM	TO	WIDTH	Au g/t
OY11-041D	79.65	152.00	768285	1524193	63.85	65.15	1.30	6.75
OY12-053D	118.55	155.00	768263	1524147	88.65	89.00	0.35	10.84
OY12-051D	120.65	158.00	768259	1524172	71.25	74.75	3.50	7.29
OY11-042D	83.10	155.00	768238	1524149	70.71	71.69	0.98	8.91
OY11-043D	76.25	155.00	768181	1524133	49.15	50.00	0.85	0.80

** Note that all high gold values are cut to a maximum of 34.286g/t (1.00oz per ton). There is no bottom cut: all values within the interval are included, it being too early for distinction between waste and ore.

Drill hole OY11-039 was concluded at 50.15m due to intersection of historic workings. Drilling on the eastern 250m of the North Vein will recommence once drilling is completed on both the bull's eye anomaly of Border South, and the new exposure on Border Central Vein. Drilling of OY12-056 to probe the bull's eye anomaly continues.

All drillholes in this program used HQ series for the uppermost 25-40m, and thereafter used triple-tube wireline N series. All cores were oriented and saw-split before sampling. Cores are stored at the Company facility in the city of Banlung, Ratanakiri province. All analyses were done by ALS-Chemex in Vientiane, Laos for gold by single assay ton fire assay with an AA finish, and in Brisbane, Australia for base metals by ICP-MS following acid digestion. Higher value results were analysed in duplicate. Company QA/QC protocol requires the insertion of some 20% of blank and standard samples on a randomized basis throughout the sample sequence. The protocol further requires that no sample interval be greater than 1.0 m or less than 0.25 m.

Drill supervision and logging was all done by company geologists under the direction of Kurtis Dunstone, G.AIG, Exploration Manager for **ANGKOR**. Mr. Dunstone is a graduate of Latrobe University, Melbourne, and Universitet Göteborg, Sweden, with 10 years of experience in mineral exploration. He is stationed in Banlung, Cambodia.

The QP for this release, which he wrote and approved, is Adrian G. Mann, P.Geol., VP Exploration for **ANGKOR**. He is a graduate of London University and of the University of the Witwatersrand, with over 40 years world-wide experience in mineral exploration and mining geology. Dr. Mann lives in Calgary, Alberta.

ANGKOR GOLD CORPORATION is a public company listed on the TSX-Venture exchange. The company has 4 exploration licenses in the Kingdom of Cambodia covering a total of 1167 km² and 3 Memoranda of Understanding with the Ministry of Mines, Industry and Energy covering a further 1499 km². The company has been actively exploring these concessions over the past 2¹/₂ years, and has now covered all 7 tenements with stream sediment geochemical sampling, has flown low level aeromagnetic surveys over much of the ground, drilled some 11,326 metres of NQ core in 99 holes, and has collected in excess of 16,000 'C' zone soil samples in 8 centres of interest, over a combined area of 19km², in addition to numerous trenches and detailed geological field mapping. Exploration on all tenements is ongoing.

THIS PRESS RELEASE, REQUIRED BY APPLICABLE CANADIAN LAWS, IS NOT FOR DISTRIBUTION TO U.S. NEWS SERVICES OR FOR DISSEMINATION IN THE UNITED STATES, AND DOES NOT CONSTITUTE AN OFFER TO SELL OR A SOLICITATION OF AN OFFER TO SELL ANY OF THE SECURITIES DESCRIBED HEREIN IN THE UNITED STATES. THESE SECURITIES HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR ANY STATE SECURITIES LAWS, AND MAY NOT BE OFFERED OR SOLD IN THE UNITED STATES OR TO U.S. PERSONS UNLESS REGISTERED OR EXEMPT THEREFROM

Reader Advisory

Except for statements of historical fact, this news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. In particular, forward-looking information in this press release includes, but is not limited to, statements with respect to the timing and completion of the Corporation's financings and related information. Although we believe that the expectations reflected in the forward-looking information are reasonable, there can be no assurance that such expectations will prove to be correct. We cannot guarantee future results, performance or achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the statements are made and are founded on the basis of expectations and assumptions made by the Corporation. Such forward-looking information is subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: general economic conditions in Canada, Cambodia, the United States and globally; industry conditions, including fluctuations in the prices of gold and other base metals; governmental regulation of the mining industry in both Canada and Cambodia, including environmental regulation; unanticipated operating events or performance which can reduce production or cause production to be delayed; failure to obtain industry partner and other third party consents and approvals, if and when required; competition for and/or inability to retain mining equipment and other services; the availability of capital on acceptable terms; the need to obtain required approvals from regulatory authorities; stock market volatility; liabilities inherent in mining operations; competition for, among other things, capital, undeveloped lands, skilled personnel and supplies; incorrect assessments of the value of acquisitions; geological, technical, drilling, processing and transportation problems; changes in tax laws and incentive programs relating to the mining industry; failure to realize the anticipated benefits of acquisitions and dispositions; and other factors. Readers are cautioned that this list of risk factors should not be construed as exhaustive.

The forward-looking information contained in this news release is expressly qualified by this cautionary statement. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.

Neither the TSX Venture nor its regulation services provider (as that term is defined in the policies of the TSX Venture) accepts responsibility for the adequacy or accuracy of this press release.
