

ANGKOR RESOURCES EXPANDS WILD BOAR GOLD PROSPECT WITH ITC

GRANDE PRAIRIE, ALBERTA (March 12, 2024): ANGKOR RESOURCES CORP. (TSXV: ANK and OTCQB: ANKOF) (“ANGKOR” or the “Company”) announces that it has expanded the Wild Boar gold prospect on Andong Meas License and are proceeding with activities to advance further exploration on this and other prospects in Ratanakiri province.

The area expands Wild Boar to the north of the existing Wild Boar gold prospect, and now the area is roughly nine square kilometers. The Wild Boar prospect consists of numerous narrow epithermal veins associated with the Canada Wall copper gold porphyry located about three kilometers to the west. Mapping and sampling north of the main Wild Boar prospect has resulted in the discovery of skarn style mineralization consisting of sulphide and magnetite mineralization at the contact between intrusive dikes and calcareous sediments. Exploration is ongoing and the previously completed magnetic survey is undergoing interpretation.

Participating in the activities are four 5th-year Institute of Technology of Cambodia (“ITC”) geology interns; three are young women. The ITC geologists are undertaking a six-week apprentice practicum with Angkor geologists and will use the experience and locations for their dissertations for graduation.

The team has been in the field for three weeks and will continue until coverage of the extended prospect is complete. GPS units and compass are deployed for accurate mapping and the samples like those shown below will be processed and then analyzed with the company’s portable XRF upon return to the Banlung office. Termite mounds continue to be targeted for sampling because of the indicative results they bring to soil samples down to the water table.

QUALIFIED PERSON:

Dennis Ouellette, B.Sc., P.Geo., is a member of The Association of Professional Engineers and Geoscientists of Alberta (APEGA #104257) and a Qualified Person as defined by National Instrument 43-101 (“NI 43-101”). He is the Company’s VP Exploration on site and has reviewed and approved the technical disclosure in this document.

ABOUT ANGKOR RESOURCES CORPORATION:

Angkor Resources Corp. is a public company, listed on the TSX-Venture Exchange, and is a leading resource optimizer working towards mineral and energy solutions across Canada and Cambodia. Angkor’s carbon capture and gas conservation project in Saskatchewan, Canada is part of its long-term commitment to Environmental and Social projects and cleaner energy solutions across expanding jurisdictions. The company holds three mineral exploration licenses in Cambodia and its subsidiary, EnerCam Resources, was granted an onshore oil and gas license of 7300 square kilometers in the southwest quadrant of Cambodia.
