

ANGKOR RESOURCES REPORTS DRILLING COPPER PORPHYRY ON ANDONG BOR LICENSE, CAMBODIA

GRANDE PRAIRIE, ALBERTA (June 25, 2025): ANGKOR RESOURCES CORP. (TSXV: ANK) (“ANGKOR” OR “THE COMPANY”) announces commencement of drilling on the Andong Bor ground to Thmei North prospect on the Andong Bor license.

As follow up to the geophysical work completed earlier in 2025, and reported in April, [ANGKOR RESOURCES REPORTS MAGNETIC SURVEY RESULTS FROM ANDONG BOR COPPER GOLD LICENSE, CAMBODIA | Angkor Resources Corp.](#), the drilling team has been deployed to undertake infill drilling within this better-defined copper soil anomaly, to obtain results about the continuity of mineralization.

Currently, there are 13 drill collar holes identified on the target area, with the first six holes to a depth of 150 meters. Those six holes are planned north of the historic holes of 008 and 005 which have significant copper intercepts.

Detail of copper anomaly showing location of previous drill holes

Earlier holes were verified in 2022 [ANGKOR CONFIRMS 108 METRES OF 0.53% COPPER EQUIVALENT AT ANDONG BOR, CAMBODIA | Angkor Resources Corp.](#)

The target holes were determined based on the summary of the results of the ground magnetic survey completed on Andong Bor license during early 2025. The closely-spaced survey and subsequent analysis identified features with existing geochemical anomalies. They were cross referenced with previous core logging and the analysis showed that mineralized zones are also identifiable by significant magnetic anomalies. The 2D Models of the survey suggest the magnetic features are 300 to 500m in area and range in depth from 100 to 150 metres in Zone C.

Dennis Ouellette, VP Exploration for Angkor comments, “The Zone C, which included three of the previously drilled holes, is the priority for concentrating these drilling efforts. Drilling will run 24 hours/day for several weeks.”

QUALIFIED PERSON:

Dennis Ouellette, B.Sc., P.Geo., is a member of The Association of Professional Engineers and Geoscientists of Alberta (APEGA #104257) and a Qualified Person as defined by National Instrument 43-101 (“NI 43-101”). He is the Company’s VP Exploration on site and has reviewed and approved the technical disclosure in this document.

ABOUT ANGKOR RESOURCES CORPORATION:

ANGKOR Resources Corp. is a public company, listed on the TSX-Venture Exchange, and is a leading resource optimizer in Cambodia working towards mineral and energy solutions across Canada and Cambodia. ANGKOR's carbon capture and gas conservation project in Saskatchewan, Canada is part of its long-term commitment to Environmental and Social projects and cleaner energy solutions across expanding jurisdictions. The company's mineral subsidiary, Angkor Gold Corp. in Cambodia holds three mineral exploration licenses in Cambodia and its Cambodian energy subsidiary, EnerCam Resources, was granted an onshore oil and gas license of 3729 square kilometers in the southwest quadrant of Cambodia called Block VIII. Since 2022, Angkor's Canadian subsidiary, EnerCam Exploration Ltd., has been involved in gas/carbon capture and oil and gas production in Evesham, Saskatchewan.
